The Role of Hand Hygiene

Preventing the spread of infection is a constant daily challenge in healthcare environments with constrained time and resources; thus, the need to implement good hand hygiene behaviour is crucial in helping to increase compliance and reduce the risk of healthcare associated infections.

With healthcare professionals required to perform hand hygiene as much as 50 to 100 times per day, it is also clear that keeping the skin properly conditioned is a vital part of good hand hygiene practice. Poor skin condition is known to have a negative impact on hand hygiene compliance and skin health needs to be incorporated into any compliance plan to help prevent dry, chapped, and sore skin.

The Facts

- Hands are the primary route for the spread of germs in the healthcare environment.
- Keeping hands clean is one of the most important practices in infection prevention and control.

2 - 10 million

We have 2 - 10 million bacteria between our fingertips and elbow.

80%

80% of all infections are transmitted from the hands.

1 in 5

When you wash your hands, you can prevent 1 in 5 respiratory infections such as a cold or the flu.

3 hours

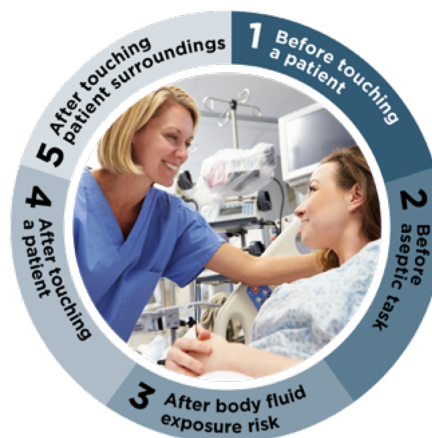

Germs can stay alive on your hands for up to 3 hours.

My Moments For Hand Hygiene

As defined by the WHO, "My Moments for Hand Hygiene" highlights the key occasions when healthcare workers should perform hand hygiene.

The World Health Organisation recognised that:

- ✓ Hand hygiene is the primary measure to reduce infections.²
- ✓ The infections lead to serious illness, prolonged hospitalisation, disability and death.²
- ✓ Clean Care is Safer Care.¹

AIM: Create greater awareness and understanding of the importance of hand hygiene.

As a member of the World Health Organisations Private Organisations for Patient Safety (POPS) group, we help support global hygiene strategy in the fight against HCAs in healthcare environments.

Certifications

GECA

This product complies with Personal Care Products standard (PCPv4.1i-2013), GECA Standard which can be read at www.geca.eco. GECA's Ecolabel trade mark indicates the environmental performance of a product has been certified from multi-criteria perspective. Products that carry the trademark are certified environmentally preferable by GECA.

Manual and Touch Free dispensers are guaranteed for their lifetime. Guarantee applies only in Australia and New Zealand and to dispensers exclusively using SC Johnson Professional products. Other terms and conditions apply:
www.scjp.com/en-au/guarantee

ECARF Seal of Quality

This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for being well tolerated by sensitive skin.
www.ecarf-siegel.org/en/about-seal

BioCote® is a registered trademark of Biocote Limited. BioCote® silver ion-based technology effectively reduces bacteria, mould and fungi on the surface of BioCote® treated dispenser push buttons within as little as 2 hours and achieves up to 99.99% reduction over a 24 hour period. Efficacy is independently validated by ISO methods. BioCote® maintains its antimicrobial protection for the lifetime of the dispenser button and will not wear off, wash off or leach out. BioCote® technology is not a substitute for good hand hygiene practices.

Protecting the Patient, Caregiver, and Healthcare Environment

As part of a family company at work for a better world™, we aim to help facilities maintain a safe healthcare environment and protect both patients and workers. After a century of making quality products that work, we have assembled a professional healthcare portfolio that is research driven, solutions focused, and trusted by hospitals and healthcare providers.

Our mission is to provide an ecosystem of essential skin care and hygiene products alongside resources and support tools to help healthcare facilities. Our dedicated range of products help with the implementation of infection prevention and control programs designed to promote safety, reduce healthcare associated infections, slow the spread of infectious disease, and reduce costs while improving quality.

Essential **Products**

A 3-Step range developed specifically for healthcare environments

Support **Tools**

Learning, education, and prompt tools to support the implementation of hand hygiene and skin care best practice

Driving **Compliance**

A 6-Stage, action-led plan for driving and maintaining compliance

Tailored for any healthcare environment

+ Complies to EN 1500, EN 12791 and ASTM E1174 standards. Use only as directed. Always read label and product information before use.

The washroom foam soap range

FRESH CLEAN *Innovation*

Crafted with feedback from the healthcare industry, the Cutan® handwash was reformulated to remove Methylisothiazolinone (MIT).

The exciting range includes a unique signature fragrance option and the classic fragrance-free and dye-free foam soaps, which are all GECA certified. With just one pump, it's proven to wash away 99% of dirt and germs when used properly.

The Cutan® Clear and Luxury foam handwash are biodegradable¹, that have been formulated with mild preservatives, specifically formulated with one of the mildest preservatives to reduce the risk of skin irritation from using this product. With added skin conditioners, making them pleasant on the hands and suitable for all ages.

Whether in hospitals, aged care facilities, medical centres or dental practices, the Cutan® product range delivers the quality customers want with features that redefine the foam handwash experience.
