About SC Johnson Professional®

An expanded organisation for professional users

SC Johnson™ has a long history in the professional market, in which it started operating in the 1930's. In 2015, the company began its return to the professional market with the acquisition of Deb Group and has now brought the company into an expanded SC Johnson Professional® organisation to serve as a total solutions provider for industrial, institutional & healthcare users.

The expanded SC Johnson Professional® organisation incorporates the Deb range of specialist occupational skin care products along with the well-known SC Johnson™ consumer brands and innovative specialist professional cleaning and hygiene products.

With deep category and technical expertise, the SC Johnson Professional® product range provides solutions ranging from skin care, floor care and surface care, through to air care, storage and pest control.

SC Johnson Professional® brands include Cutan, which is a specialised range of products for Healthcare environments, and globally recognised brands including; Windex, Duck, Drano, Mr Muscle and OUST.

“Rethinking the Professional Experience”

Our purpose is to bring innovative, quality products and services to professional markets that rethink how people and organisations experience skin care, cleaning and hygiene.

We enable customers to create cleaner, healthier and safer workplaces and public environments.

This is achieved through outstanding products and services which create efficiencies, reduce inventories, simplify training and create a positive user experience.

SC Johnson™ A family company at work for a better world

SC Johnson™ is a family company dedicated to innovative, high-quality products, excellence in the workplace and a long-term commitment to the environment and the communities in which it operates. Based in the USA, the company is one of the world's leading manufacturers of household cleaning products and products for home storage, air care, pest control and shoe care, as well as professional products.

The 132-year-old company, which generates \$10 billion in sales, employs approximately 13,000 people globally and sells products in virtually every country around the world.

Forging Trust with Industry Leading Principles of Practice

There's relief that comes with one of the world's most trusted companies, combining trustworthy known brands. SC Johnson's™ strong ethics and professionalism is written into our charter and practised by our people at every level, from healthcare to everyday cleaning, care and storage.

With a culture of respect comes trust with our market expertise and product reliability. We care about meeting our customers and their end user's needs, quality requirements, budget, compliance needs, encompassed with health and safety.

In this way, together we are creating a better world, with a business focusing on the core of our customer centric business, as the fundamental of what we do.

SC Johnson Professional® Product Capability

Mitigating the transmission of infections is an ongoing, daily challenge within healthcare settings with constrained time and resources; thus, the need to implement good hand hygiene behaviour is crucial in helping to increase compliance and reduce the risk of healthcare associated infections.

With healthcare professionals required to perform hand hygiene as much as 50 to 100 times per day, it is also clear that keeping the skin properly conditioned is a vital part of good hand hygiene practice. Poor skin condition is known to have a negative impact on hand hygiene compliance and skin health needs to be incorporated into any compliance plan to help prevent dry, chapped, and sore skin.

SC Johnson Professional® Healthcare Solutions

Trusted Innovation, Research and Development

Our customers trust our products' quality, efficacy and formulation to meet industry standards and regulations.

Support

For any organisation, the implementation of skin care practices that are collectively followed and universally understood is an ongoing challenge.

Therefore, to help with this process, we have created a unique education and audit support program available to all customers of our skincare range.

Ongoing Site Education & Awareness

To help maintain improved skin care standards, we provide a number of communication tools to support ongoing education and awareness.

Audit / Conducting 'Pre & Post' Audit

Audits help establish and maintain the effectiveness of our skin care program and ensure you are completely satisfied with the newly installed products.

Our people are our strength, offering the right Technical Support for our Customers

The Installation of SC Johnson Professional® dispensers/ brackets in designated areas as per audit documentation, will commence as per scheduled implementation schedule/plan by one of our appointed SC Johnson Professional appointed installer or contractors, or by one of our SC Johnson Professional representative and Distributor.

SC Johnson Professional appointed installer/contractor will remove old brackets/dispensers, collect them all and bring back to the supply area for the health service to handle further (i.e. dispose of or advise the previous supplier to organise collection).

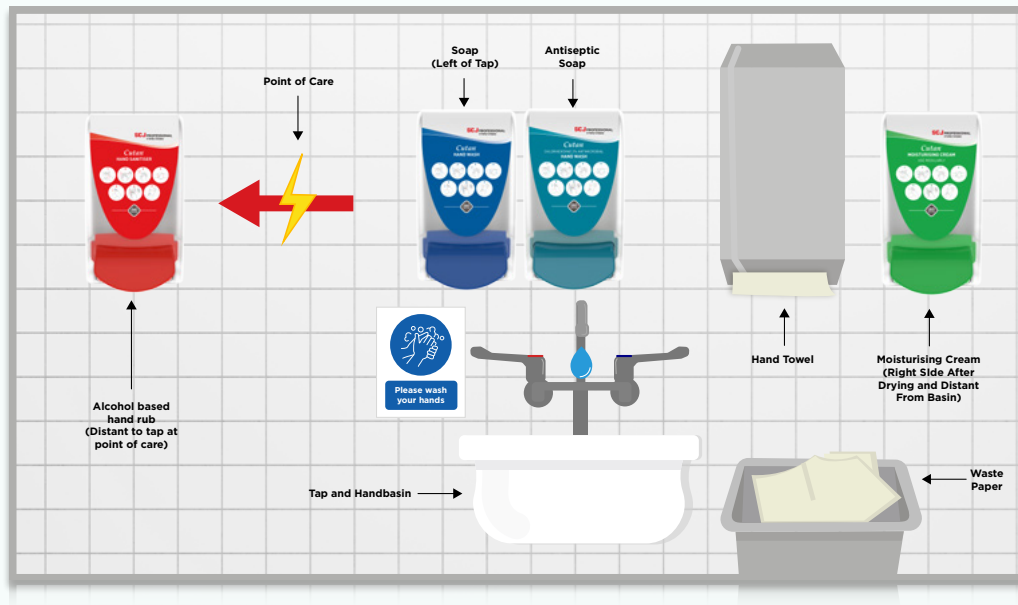

SC Johnson Professional and its distributor representative will offer to simultaneously install the hand hygiene wall signs, dispenser surrounds/strips as well as loading product cartridges in the newly installed SC Johnson Professional dispensers/brackets.

SC Johnson Professional and its distributor representative will conduct in-service/education sessions at the ward/department level with key nursing and cleaning staff on how to use and change SC Johnson Professional's products.

Please note, the key IPAC contact needs to be available on request to assist with any changes to dispensers/brackets locations during the installation process.

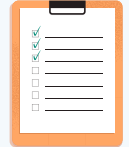

Implementation/Installation duration will depend on the health service size of the facility and access to specific areas. In our experience, larger public hospital groups prefer to have staged dispenser implementations which can take three (3) to six (6) months.

Placement of **Social Soap, Antiseptic Soap, Hand Towels, Hand Moisturiser and Alcohol Based Hand Rub** in relation to the basin

Industry Specific Tips

Healthcare (Hospitals and Aged Care Facilities)

 <p>The use of an awl tool is recommended to avoid drilling into drywall</p>	 <p>SCJP or Infection Control Practitioner (ICP) will advise if items such as face mask, gowns, hair net or other infection prevention items are required</p>	 <p>Check with ICP to ensure patient room protocol before installing point of care dispensers</p>	 <p>Common courtesy to check washroom areas before entering</p>	 <p>Please ensure clean work area during installation and when completed</p>	 <p>Contractors should carry out hand hygiene after touching patient surroundings</p>
---	--	--	--	---	--

Commercial (Washroom and Public Areas)

 <p>Check with facility maintenance to close washroom access during installation</p>	 <p>Common courtesy to check washroom areas before entering</p>	 <p>When in offices/public areas please be courteous to staff/public to minimise disruption</p>	 <p>Please ensure clean work area during installation and when completed</p>

Our Sustainability Commitment

As part of a family company committed to creating a better world, we want to help you achieve your sustainability goals. Our innovative products and programmes are designed to support you to create safe and healthy environments for the people you care for, but in a sustainable way to “Use less. Waste Less. Recycle More.”

Challenge for organisations

Sustainability is a major challenge for businesses

Many businesses have policies and strategies for being more sustainable.

The challenge is making efforts that enable real progress to be made.

All efforts to be more sustainable are good efforts, no matter how big or small.

However, doing everyday things better are easy to action and can accumulate to have a significant impact towards supporting sustainability goals.

What's important is combining the collective impact of these efforts, with a continuous culture of striving to achieve more, to drive real positive change.

Better business. Better world.

Embracing sustainability can bring many benefits to your business, and help build a better, more sustainable world.

Our DNA

Sustainability is part of our DNA

By partnering with us you can harness our strategic approach to help achieve your sustainability goals.

Grounded in science

Our comprehensive strategy for sustainability is grounded in science which means everything we do is backed by evidence and data, so you can trust what our products and programmes will do for your organisation. Our strategy is particularly focused on reducing the use of plastics and the application of science-based chemistry to continually improve our products by choosing ingredients that better protect human health and the environment.

Quality, Compliance & Sustainable Credentials to meet Industry Standards

We have a range of certifications and independent recognition of our quality systems and products. This offers our customers the assurance that they can trust our brands when it comes to compliance with healthcare regulations through the Therapeutic Goods of Australia and industry certifications for:

GECA

This product complies with Personal Care Products standard (PCPv5.0-2022), GECA Standard which can be read at www.geca.eco. GECA's Ecolabel trade mark indicates the environmental performance of a product has been certified from multi-criteria perspective. Products that carry the trade mark are certified environmentally preferable by GECA.

ECARF Seal of Quality

This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for being well tolerated by sensitive skin. www.ecarf-siegel.org/en/about-seal.

Manual and Touch Free dispensers are guaranteed for their lifetime. Guarantee applies only in Australia and New Zealand and to dispensers exclusively using SC Johnson Professional products. Other terms and conditions apply: www.scjp.com/en-au/guarantee

BioCote® is a registered trademark of Biocote Limited. BioCote® silver ion-based technology effectively reduces bacteria, mould and fungi on the surface of BioCote® treated dispenser push buttons within as little as 2 hours and achieves up to 99.99% reduction over a 24 hour period. Efficacy is independently validated by ISO methods. BioCote® maintains its antimicrobial protection for the lifetime of the dispenser button and will not wear off, wash off or leach out. BioCote® technology is not a substitute for good hand hygiene practices.

ISO Accreditations assure best Business Practice

We have achieved the two most widely recognised accreditations to acknowledge quality and sustainability in business best practice.

- ISO 22716 provides guidance to documenting and regulating the production, control, storage, and shipment of cosmetic products. The standard's guidelines will provide your organisation with practical methods for managing the many factors that can affect product quality.
- ISO 9001 Certification applies a Quality Management System (QMS) to streamline operations and enhance customer satisfaction. This encourages our performance evaluation, dedication to excellence and our risk-based mindset.
- ISO 14001 creates a strong environmental management system (EMS) to manage environmental issues, ensure compliance, and address operational risks and opportunities. This fosters continuous improvement toward environmental goals.
